

CATALOGO GENERALE  
GENERAL CATALOGUE | CATALOGUE GENERAL | GENERAL KATALOG

2023

NOTE  
Notes . Notes . Anmerkungen

Le informazioni contenute nel presente catalogo sono il più possibile esatte, ma non sono da ritenersi legalmente vincolanti.  
Per esigenze di produzione l'Azienda si riserva il diritto di apportare eventuali modifiche che si rendessero necessarie. Peso, colori e misure sono soggetti alle inevitabili variazioni tipiche del processo di cottura della ceramica. I colori si avvicinano il più possibile a quelli reali nei limiti consentiti dai processi di stampa.

The information contained in this catalogue is as accurate as possible, but cannot be considered as legally binding. The Company reserves the right to make any modifications that become necessary due to production requirements. Weight, colours and dimensions are subject to the inevitable variations typical of the ceramic firing process. The colours are as close as possible to the actual colours, within the limits allowed by the printing process.

Les informations reprises dans ce catalogue sont exactes, mais elles n'engagent aucunement notre Société du point de vue légal. Pour des exigences de production la Société se réserve le droit d'apporter toutes les modifications qui s'avèreraient nécessaires. Les poids, les couleurs et les dimensions sont assujettis aux variations typiques du processus de cuisson de la céramique. Les couleurs sont très proches des teintes naturelles, dans les limites admises par les processus d'impression.

Die Informationen des vorliegenden Katalogs sind so exakt wie möglich, sind jedoch nicht als gesetzlich verbindlich zu betrachten. Aus Fertigungsgründen behält die Firma sich das Recht vor, eventuell notwendige Änderungen vorzunehmen. Gewicht, Farben und Abmessungen unterliegen den unvermeidlichen Veränderungen, die für den Brennvorgang von Keramikprodukten typisch sind. Die Farbtöne entsprechen weitestmöglich den realen Farben, soweit der Druckvorgang dies zulässt.

**CONSIGLI DI UTILIZZO DEI NOSTRI PRODOTTI**  
**SUGGESTION ON HOW TO USE OUR PRODUCTS**  
**CONSEILS D'UTILISATION DE NOS PRODUITS**  
**EMPFEHLUNGEN FÜR DIE ANWENDUNG UNSERER PRODUKTE**

Per un corretto utilizzo dei nostri prodotti da pavimento occorre tenere presente oltre alle prove di laboratorio, quale sarà il luogo di impiego. La scelta delle piastrelle deve dunque essere il risultato di analisi approfondite. Il numero che troverete inscritto nello spazio PEI vicino al nome di ogni prodotto GPS, indica uno dei cinque gruppi di usura con cui FRASSINORO ha classificato i suoi pavimenti considerando le normative Europee EN, i risultati dei test cui vengono sottoposti i prodotti nel laboratorio di ricerca interno all'azienda e l'esperienza acquisita nei numerosi anni di impiego dei nostri materiali.

VEDI TABELLE: Classificazione delle piastrelle da pavimento per la resistenza all'usura, categoria di resistenza allo scivolamento con piedi calzati.

È inoltre estremamente importante seguire alcune norme di manutenzione e pulizia per mantenere inalterato nel tempo un bell'aspetto del prodotto. Risulta così importantissimo utilizzare zerbini di adeguate dimensioni e nei posti più opportuni onde eliminare gli agenti abrasivi prima che questi entrino in contatto con i pavimenti. Inoltre durante e successivamente la posa della pavimentazione nel periodo che coincide con fasi di attività del cantiere edile è importante operare in maniera tale da eliminare agenti abrasivi dalle pavimentazioni o attraverso la pulizia o attraverso elementi di protezione. Tutti i prodotti di questo catalogo sono altamente greificati. Per questo, l'abituale immersione in acqua che solitamente precede la posa, non è necessaria. Può essere comunque eseguita in modo rapido per togliere dal retro delle piastrelle lo strato di polvere che potrebbe pregiudicare una corretta adesione. Se la superficie di posa è ampia debbono essere predisposti giunti di dilatazione distanziati di circa 4 metri l'uno dall'altro. Subito dopo la posa è necessario pulire con cura il pavimento usando particolare attenzione quando la stuccatura dei giunti è colorata.

To properly use our floor tiles besides the laboratory tests one must also consider where they will be used. The choice of tile must be carefully thought out. The number you find in the PEI box near the name of each product GPS indicates one of five categories of uses. Frassinoro has assigned each product a classification on the basis of European EN standards, the results of laboratory testing on the products performed by the company research department and years of experience with these materials. SEE TABLES: Classification of the floor tiles for wear resistance, Slip resistance groups with footwear. It is also extremely important to follow some standard maintenance and cleaning procedures to keep the beauty of the product unchanged in time. It is, therefore, extremely important to use mats

of appropriate size located at suitable points so as to eliminate abrasive agents before they come into contact with the flooring. Finally, both during and after laying of the floor, while construction is still in progress, it is important to operate in such manner as to eliminate any abrasives from the floor. This may be done either by cleaning or by applying some form of protection. All the products in this catalogue are highly sintered. Therefore, the usual dipping in water that normally precedes the laying is not necessary. It can anyway be carried out very quickly to remove from the tile back the layer of dust that could jeopardize a correct adhesion. If the laying surface is wide, spaced expansion joints must be arranged at a distance of about 4 meters. Immediately alter the laying, clean carefully the floor, paying attention when the joint grouting is coloured.

Pour une utilisation correcte de nos produits pour sols, il est nécessaire de prendre en considération, outre les essais de laboratoire, également que quel sera l'endroit d'utilisation. Le choix des carrelages devra donc être le résultat d'analyses approfondies. Le numéro que vous verrez imprimé dans le petit carré PEI près du nom de chaque produit GPS indique l'un des cinq groupes d'usure avec lesquels Frassinoro a classé ses carrelages. Ce classement a été réalisé en considération de la réglementation européenne EN, des résultats des tests auxquels ont été soumis les produits dans le laboratoire interne de recherche de l'établissement, ainsi que de l'expérience acquise au cours des nombreuses années d'utilisation de nos matériaux. VOIR LES TABLEAUX: Classement de nos carreaux de sols selon la résistance à l'usure, Catégories de résistance au glissement les pieds chaussés. Il est en outre d'une extrême importance suivre certaines normes de manutention et d'entretien afin de garder inaltéré dans le temps le bel aspect du produit. Il en résulte donc l'importance de mettre des paillasons ayant des dimensions adéquates et cela aux endroits les plus indiqués afin d'éliminer les agents abrasifs avant que ceux-ci n'entrent en contact avec les carrelages. En outre, au moment de la pose du carrelage et successivement, pendant la période qui comcide aux phases d'activité du chantier de construction il est important d'opérer de façon telle à éliminer les agents abrasifs pour les sols soit à travers le nettoyage soit avec l'emploi d'éléments de protection.

Tous les produits illustrés dans ce catalogue présentent un haut degré de synthésisation. C'est pour cela que le prolongement dans l'eau, qui précède généralement la pose, n'est pas nécessaire. Ce traitement peut toutefois être rapidement exécuté pour éliminer la couche de poussière sur la partie arrière des carreaux pouvant compromettre la bonne

adhérence de ceux-ci. Si la surface de pose est assez vaste, il faut prévoir des joints de dilatation intercalés entre eux d'environ 4 mètres. Immédiatement après la pose, il faut nettoyer avec soin le carrelage, tout en prêtant un soin particulier si le masticage des joints est coloré.

Für eine korrekte Anwendung unserer Bodenfliesen ist außerdem den Laborproben zu beachten, wo diese zu verlegen sind. Die Wahl der Fliesen hat somit genauer Überlegungen zu unterliegen. Die Nummer PEI, die Sie in dem Quadrat neben dem Namen jedes Produktes GPS finden, gibt Ihnen eine der fünf Anwendungsgruppen an, in die die Frassinoro ihre Bodenfliesen klassifiziert hat. Diese Klassifizierung erfolgte unter Zugrundelegung der europäischen Norme, die Ergebnisse der Tests, denen das Material im Untersuchungslabor unseres Unternehmens unterworfen werden und der Erfahrung bei der Anwendung im Laufe der zahlreichen Jahren.

SEHEN DIE TABELLEN: Eingruppierung glasierter Bodenfliesen nach dem Oberflächenverschleisswiderstand, Rutschhemmungskategorien mit Schuhwerk. Es ist darüberhinaus von größter Bedeutung einige Pflege- und Reinigungsvorschriften zu beachten, um im Laufe der Jahre einen gleichbleibenden Aspekt des Produktes beizubehalten. Es ist deshalb besonders wichtig, angemessen Fußmatten an den Eingängen zu legen, um so die den Fußboden beschädigenden schiefehenden Mittel vor dem Betreten desselben zu entfernen. Darüberhinaus ist bei der Verlegung und in der Folge darauf zu achten, daß während der noch auszuführenden Bauarbeiten, verschleißende Substanzen den Boden kratzen. Er muß deshalb entweder durch Sauberung oder Abdeckung geschützt werden.

Alle Produkte aus diesem Katalog sind hochgesintert. Aus diesem Grunde ist das normalerweise erforderliche Eintauchen der Platten in Wasser vor dem Legen überflüssig. Ein kurzes Abspülen des sich evtl. auf der Plattenunterseite festgesetzten Staubes könnte sich für eine korrekte Haftung von Nutzen erweisen. Sind die mit Fliesen auszuleidenden Flächen groß, so sind in einem Abstand von jeweils 4 m Dehnungsfugen vorzusehen. Gleich nach dem Legen muß man den Fußboden sofort reinigen; besondere Vorsicht sei geboten, wenn ein eingefärbter Fugenstück verwendet wurde.

Il gres porcellanato porfirizzato massivo ed il gres porcellanato in genere, analogamente ad i prodotti naturali, richiede una attenta manutenzione.

Sugeriamo per mantenere al meglio l'aspetto e le caratteristiche originali del prodotto di seguire queste indicazioni di carattere generale:

A) non lasciare depositare troppo a lungo le macchie di sporco sul pavimento, cercando di asportarle prima possibile;  
 B) per ottenere i migliori risultati di pulizia si consiglia di trattare ogni tipo di macchia con un detergente specifico. Abbiamo riportato nella tabella le principali indicazioni per la pulizia e il genere di sporco, segnalateci dai nostri laboratori.  
 Per macchie particolarmente resistenti si consiglia di lasciare agire il detergente per periodi prolungati 4-8-12 ore.  
 Per la pulizia e manutenzioni dei propri pavimenti FRASSINORO consiglia prodotti e sistemi"

The massive porphyzied fine porcelained stoneware, and porcelained stoneware in general, require a careful maintenance, like all natural products. We recommend to follow the general indications below to preserve in the best way the original look and features of these products.

A) Do not let dirt stains deposit for too long on the floor, trying to remove them as soon as possible.  
 B) To get the best cleaning results, it is advisable to treat every kind of stain with a special detergent.

**NORME DI MANUTENZIONE**  
**MAINTENANCE INSTRUCTIONS**  
**GUIDE D'ENTRETIEN**  
**PFLEGE HINWEISE**

The next table shows the main indications for the cleaning and dirt type, according to the suggestions of our laboratories. For very resistant stains, let the detergent work for long periods, 4-8-12 hours. For best cleaning and maintenance of ist own tiles "FRASSINORO "recommends the detergents and treatments"

Le grès cérame porphyré massif ainsi que le grès cérame en général, de même que les produits naturels, exigent un entretien minutieux.

Il est conseillé, en vue de maintenir au mieux l'aspect et les caractéristiques d'origine du produit, de suivre les indications de caractère général ci-dessous:

A) ne pas laisser déposer trop longtemps les taches de saleté sur le carrelage, en cherchant à les enlever le plus tôt possible.  
 B) Afin d'obtenir les résultats de nettoyage les meilleurs, il est conseillé de traiter toute sorte de tache à l'aide d'un détergent spécifique. Au tableau ci-contre figurent les indications principales pour le nettoyage et le genre de saleté, nous étant signalé par nos laboratoires.

Quant aux taches particulièrement persistantes, il vaut mieux de laisser agir le détergent pour des périodes prolongées de 4/8/12 heures.

Pour le nettoyage et l'entretien des ses carrelages, FRASSINORO conseille l'utilisation de produits et méthodes "

**PRIMA PULIZIA  
INITIAL CLEANING  
PREMIERE NETTOYAGE  
ERSTE REINIGUNG**

La manutenzione del GRES FINE PORCELLANATO FRASSINORO è particolarmente semplice. Occorre anzitutto accertarsi che, dopo la posa, il pavimento sia stato correttamente pulito e non presenti tracce di calce, cemento o residui di altro genere.

Per evitare che un eventuale prodotto a base acida, usato per la prima pulizia, vada ad intaccare il riempimento a base cementizia delle fughe, è necessario, prima della operazione di pulizia, bagnare il pavimento affinché le fughe vengano impregnate e pertanto protette dall'azione corrosiva dell'acido stesso.

Se la prima pulizia deve essere fatta dopo che il pavimento è stato usato, sarà bene, prima del trattamento del prodotto acido, togliere con appositi detersivi eventuali presenze di sostanze grasse o simili.

Dopo la pulizia occorre risciacquare abbondantemente il pavimento, raccogliendo poi l'acqua residua.

FRASSINORO fine porcellain stoneware is very easy to look after.

First of all, make sure that after laying, the floor has been properly cleaned and does not show traces of lime, cement or other residues.

To prevent any acid-base product, used for

initial cleaning, attacking the cement-base filling of the joints, before starting cleaning operations, wet the floor until the joints are soaked and thus protected from the corrosive action of the acid. If initial cleaning is done after the floor has been used, before the acid-product treatment, it is best to remove any grease or similar with a detergent product. After cleaning, swill the floor well and dry up excess water.

L'entretien du grès cérame FRASSINORO est particulièrement simple.

Tout d'abord, vérifiez si le sol a été correctement nettoyé après la pose et s'il ne présente plus de traces de chaux, ciment ou résidu de toute autre nature.

Pour éviter qu'à sa première utilisation un produit de lavage acide n'attaque le remplissage des joints à base de ciment, il est recommandé de mouiller le sol avant de le laver afin que les joints soient imprégnés et par conséquent protégés contre l'action corrosive de cet acide.

Si la première nettoyage a lieu sur un carrelage déjà utilisé, il convient, avant de la traiter avec le produit acide, d'enlever, à l'aide de détergents, toute trace de gras ou de matières semblables.

Après le nettoyage, rincer abondamment le

carrelage et enlever l'eau résiduelle.

Das FRASSINORO Feinsteinzeug ist sehr pflegen. Vor allem muß man sich vergewissern, daß der Fußboden nach der Verlegung

ordnungsgemäß gereinigt wurde und keine Spuren von Kalk, Zement oder andersartigen Rückständen aufweist. Um zu vermeiden, daß bei der Reinigung ein evtl. Säurehaltiges Produkt den Fugenzement angreift, muß der Fußboden vor der Reinigung naß gemacht werden.

Auf diese Weise nehmen die Fugen Wasser auf und sind gegen den Angriff der Säure geschützt.

Wenn der Fußboden erstmalig zu reinigen ist und bereits betreten wurde, vor der Behandlung mit dem säurehaltigen Produkt evtl.

Vorhandene Spuren von Fett oder ähnlichem Schmutz mit Reingemitteln beseitigen. Nach der Reinigung den Fußboden gründlich mit Wasser nachspülen und trockenwischen.
